

SAGE video

Bring online teaching and learning to life

Engage students with video that's easy to introduce into any course format

It's easy to bring expertly-developed streaming video into your classroom through unlimited access from your library. Online or on-campus, SAGE Video streaming collections across the social, behavioral, and health sciences provide content to support pedagogical needs in a medium already familiar to students.

Why SAGE Video for online teaching and learning?

- **Easy to embed videos and custom clips** into online courses
- **Shareable playlists** make it easy to direct students to specific videos
- **Video player and features** akin to familiar mainstream platforms: Related content, saving favorites, media controls, and more
- **Robust accessibility features** including a mobile-responsive design, permalinks, hot keys, closed captioning, and full transcripts ensure reliable access to all users, on- or off-campus
- **Time-saving support for instructors.** Content is indexed by key discipline taxonomies aligned with course curricula for easy discovery through browse or keyword searches
- **Expand online student learning opportunities** with downloadable assessment questions and Continuing Education Units*
- **No extra steps or expense for students.** Video content is institutionally purchased through your library

“ I built a class on ‘Sociology of the Body.’ I provided both videos and articles on the topic to my students to accommodate different learning styles. I chose videos would interest them and help them to better understand the assigned reading. Providing videos also gives them variety—a reprieve from the usual resource, and they appreciate that.

– **Dr. Sara Sutler-Cohen, Faculty,**
Colorado State University – Global Campus

“ The use of a variety of media, including video, helps to keep students engaged in the online learning environment.

– **Susan T. Lindau, LCSW, Adjunct Professor,**
University of Southern California

Fit for any on-campus or online course

Classroom type	Video benefits
Traditional	<ul style="list-style-type: none">• Encourages engagement with course material• Fosters stronger learning environments• Helps with understanding complex theories• Provides confidence in skills-building, especially practical skills
Blended/Hybrid	<ul style="list-style-type: none">• Provides vetted content directly aligned with course aims• Creates structure between two learning models• Increases digital skills• Positively contributes to online learning
Flipped	<ul style="list-style-type: none">• Helps community-build in a flipped classroom• Central to introducing new material• Helps with self-directed learning• Increases problem solving skills• Widens class participation
Active Learning	<ul style="list-style-type: none">• Allows for more experiential learning• Fosters collaboration and group work• Eases student transition into self-guided “deep learning”• Helps close the gap between the digital native and digital learner

Use SAGE Video to

- Prompt discussion and prime topics
- Reinforce topics by assigning outside of class
- Aid and enhance independent research with citable videos in APA, Chicago, MLA, and Harvard formats
- Create variety by pairing with traditional or other digital resources
- Assess student learning with instructor-only, downloadable assessment questions
